EXPERIENCE

• Workday

Sr. Associate Software Development Engineer

Boulder, CO

Feb 2025 - Present

- **AI Agent Observability & Evaluation Platform (Python):** Architected and productionized Aval, a Python framework for evaluating LLM-powered AI agents via async, graph-based evaluations integrated with LangSmith. Engineered CI/CD packaging pipelines to accelerate developer iteration.
- **API Design & Backend Engineering (FastAPI):** Built and scaled FastAPI services powering the Workday Self-Service, AP Intelligence, and Procurement AI agents; integrated external APIs, the LangGraph agent runtime, and RDS PostgreSQL, resolving concurrency bottlenecks via async handling.
- **Full-Stack Product Development (React/TS/Python/PostgreSQL):** Led end-to-end delivery of the GenAI Studio observability & evals interface (React/TypeScript + Python), designing PostgreSQL models that power complex evaluation metrics at scale.
- **Cross-Functional Collaboration:** Partnered with product, design, and 4 stakeholder teams to iterate on the roadmap, led design reviews on architecture and data modeling, and mentored engineers.

• BioFrontiers Institute

Software Engineer

Boulder, CO

May 2024 - Jan 2025

- **Full-Stack System Modernization (React/Next.js/TypeScript):** Rebuilt a legacy web application with Next.js, TypeScript, MUI, and PostgreSQL, cutting maintenance complexity by 30%.
- **API Design & Performance Optimization:** Designed and optimized backend API routes and SSR components for data-intensive workloads, improving large-dataset delivery by 25%.
- **Data Storage & Automated Deployments:** Migrated large analytical datasets in PostgreSQL with 100% integrity and automated Docker Compose deployments, cutting deploy time by 50%.

• Workday

Software Development Engineer Intern

Boulder, CO

May 2024 - Aug 2024

- **Internal Developer Tools:** Engineered a custom Rich Text Editor dev tool for prompt validation and code testing, helping developers improve HTML formatting with a 90% success rate.
- **Automated Releases & CI/CD:** Parallelized release pipelines and test automation in GitHub Actions, reducing pipeline execution time by 15% and setup times by 25%.
- **External Service Integration:** Built service interfaces to 6 external LLM providers, standardizing diverse responses and improving system stability by 13%.

• Trimble Cloud

Software Engineer

Boulder, CO

Sep 2023 - May 2024

- **Large-Scale Distributed Systems:** Established a Kubernetes cluster for microservices and deployed AWS Lambda functions, increasing processing efficiency by 20% and reducing latency.
- **Cloud Infrastructure & Automation:** Architected distributed AWS applications with Terraform (IaC), accelerating deployment provisioning by 30%.
- **Networking & Data Storage:** Scaled RDS PostgreSQL instances and indexed large data volumes, optimizing query performance by 25%.

SKILLS

- **Languages:** Python, TypeScript, JavaScript, SQL (PostgreSQL), Java, C++, HCL (Terraform), HTML/CSS.
- **Technologies:** React, Next.js, Node.js, FastAPI, Flask, REST APIs, Docker, Kubernetes, AWS, CI/CD (GitHub Actions).
- **Data & AI:** PostgreSQL, RDS, Prisma, pandas, NumPy, LLMs, LangGraph, AI Agent Evaluation, Observability.
- **Core Competencies:** Full-Stack Development, API Design & Scaling, Distributed Systems, Stakeholder Collaboration, System Design.

EDUCATION

• University of Colorado Boulder

Bachelor of Science in Computer Science; GPA: 3.96

Boulder, CO

• University of Illinois Urbana-Champaign

Bachelor of Science in Aerospace Engineering; GPA: 3.46

Urbana-Champaign, IL
